PROFILE

Tech PHILomath that also enjoys challenges and solving problems. Risk taker through and through to seek experiences that would make me grow as a developer and as a person. Seeking an organisation that supports and promotes growth. Led and been a part of a team to reach company goals through collaboration and effective communication.

PROJECTS

The Curtain Co   MERN/AWS/Paypal/Mocha/Jest | Git/Heroku/Netlify/Trello
An eCommerce full stack web app created in accordance with client's needs and requirements. Key features include:

- Paypal Express Checkout
- Searching & filtering
- AWS S3 Image hosting
- Authentication & Authorization

AirGear Aerospace   ROR/JS/PSQL/Tailwind/AWS | Trello/Git/API/Heroku
Responsive two-sided marketplace app that connects suppliers and businesses in the aviation industry to trade aircraft parts. Features include:

- Searching & Filtering
- Authentication & Authorization
- Industry news from news API
- Pagination
- Currency conversion

Orbis Foods   NodeJS/JS/Express/Tailwind/MongoDB | Git/APIs/Trello
A full stack web app developed during Coder Academy's 2-day NodeJS Hackathon. Aims to connect recipe authors and readers with the focus of providing geographical authenticity made interactive with the Maps API along with its markers.

EXPERIENCE

Full Stack Engineer - Intern   Dingo Software | Feb 2021 - Mar 2021
Developed an interactive admin dashboard by integrating the company's API to the app using Nodejs and React. Implemented CI/CD workflow to automate tests, builds and deployment. Demonstrated the agile methodology by constantly meeting and delivering requirements.

Logistics Officer   Airnorth Engineering | Oct 2018 - Jan 2020
Demonstrated problem-solving and prioritizing skills when faced under pressure in the demanding nature of the industry.
